Paul Popa

Hard-working frontend engineer with **over 1 years of experience**, solving physical problems by proposing adequate digital solutions. Developed and maintained web components for a large pharmaceutical company therefore maximizing the creation of new brand websites. Contributed to the frontend side of the platform of a leading company in the AIOps industry. Using modern frontend tools and frameworks for achieving business goals while being involved in scrum meetings.

Experience

2/22/2021 - 7/1/2021

Modus Create Inc.
Cluj-Napoca

- Developed a job portal application for learning purposes using React, Material-UI and Apollo Client (for communication with a GraphQL server) and unit tested with React Testing Library and Jest.
- Worked on an internal project built in React with TypeScript, Material-UI and AWS Amplify, designed to help internal stakeholders manage information about employees.

7/1/2021 - PRESENT

Modus Create Inc.
Cluj-Napoca

- Collaborated with UI/UX designers in an Agile environment
- Built responsive and highly customizable web components with the ability of drag & drop using Stencil.js, Grapes.js and SCSS.
- Contributed to the internal project started during internship.

Education

10/1/2018 - 6/1/2021

Babes-Bolyai University, Faculty of Mathematics and Computer Science, Bachelor's Degree
Cluj-Napoca
